INTRODUCING HAVANA

We are delighted to announce the release of Havana, a new line of terracotta pots for indoor and outdoor use designed by the Dutch artist Paul Odekerken.

Taking design cues from the Cuban capital's uniquely coloured facades and elegantly patinated architecture, the Havana collection comes in five rich hues and features a subtle dégradé effect. With a cylindrical form that slants ever so slightly inwards, the Havana planter rests lightly on a gracefully rounded base, offering the illusion of rising naturally from the surface it sits on.

The Havana collection comes in the colours Ice, Plum, Petrol, Swamp, and Lavender, and is available in diameters of 50, 55, 70, and 80 cm.
